

JUBHELE NKULULEKO SHANGE

Senior Data Engineer | Azure Data Platforms | Data Governance

South Africa | jubhele@gmail.com | [LinkedIn](#)

Professional Profile

Senior data engineer and consultant with 14+ years across data engineering, business intelligence and database delivery, including banking, insurance, investment, mining and enterprise consulting. Builds and supports production data pipelines, warehouses and analytical models using Azure, SQL and Python, with hands-on experience in data governance, security, quality and regulated delivery. Comfortable partnering with clients, mentoring teams and working remotely across distributed environments.

Core Capabilities

- **Data engineering:** Azure Synapse, Azure Data Factory, SQL Server, ETL/ELT, stored procedures, data warehouses, dimensional modelling, data quality and reconciliation.
- **Programming and analytics:** SQL/T-SQL, Python, Pandas, Power BI, DAX, SSIS, SSRS, SSAS and Git-based delivery.
- **Governance and security:** Microsoft Purview, data classification, lineage, sensitivity labels, DLP, information protection, audit controls and regulated-data handling.
- **Consulting delivery:** stakeholder discovery, pragmatic solution design, production support, documentation, mentoring, distributed collaboration and continuous improvement.

Professional Experience

SENIOR CONSULTANT - DATA GOVERNANCE AND ENGINEERING | SAMBE CONSULTING

January 2025 - Present

- Lead Microsoft Purview delivery for a banking client, implementing enterprise data classification, sensitivity labels, information-protection controls, DLP policies and audit visibility across Microsoft 365.
- Engineered SQL analytical delivery packs for AML transaction monitoring and Watch List Filtering remediation on Azure Synapse and SQL Server, with auditable scripts and validation evidence.

- Built and maintained multi-entity financial ETL pipelines from SAP GL and FMI extracts into SQL staging and warehouse fact models, including multi-currency actuals, flash and budget processing.
- Delivered Power BI and DAX reporting, reconciliation controls and executive financial views; re-engineered asset depreciation logic into optimised SQL procedures.
- Designed a Next.js and TypeScript operational portal with REST integrations and multi-tenant data isolation for enterprise security operations.

SENIOR DATA ENGINEER | THE COCA-COLA COMPANY

June 2024 - December 2024

- Developed Azure Synapse ETL/ELT pipelines and integration solutions spanning on-premises and cloud data sources, warehouses and data lakes.
- Applied Azure Purview for cataloguing, lineage, classification and access control; improved pipeline performance, data quality and cloud cost efficiency.

DATA ENGINEER / BI DEVELOPER | STANDARD BANK

March 2024 - June 2024

- Translated business requirements into data models, ETL processes, data marts and Power BI reporting while maintaining data quality, security and stakeholder support.

SENIOR DATA ENGINEER / BI DEVELOPER | ANGLO AMERICAN

September 2022 - December 2023

- Delivered batch and real-time ingestion, ETL/ELT pipelines and data models across Azure and Snowflake; tested data flows and integrated on-premises and cloud platforms.

SENIOR DATA ENGINEER / BI DEVELOPER | INVESTEC

August 2019 - July 2022

- Designed and supported production ETL, warehouse models and BI solutions for financial services, optimising SQL structures and partnering with analysts and business stakeholders.

DATA ENGINEER / BI DEVELOPER | LIFE HEALTHCARE (CYBERPRO CONSULTING)

May 2018 - July 2019

- Built and tested BI architecture, data processes and executive dashboards; automated reporting and improved data reliability, efficiency and quality.

SENIOR BI DEVELOPER | OSIRIS TRADING

October 2014 - January 2018

- Designed warehouse models, SSIS integrations, SSRS reporting and analytical solutions for risk and payments; performed QA and mentored junior developers.

BI DEVELOPER | MIWAY INSURANCE

May 2012 - September 2014

- Supported data warehouse design, data extraction and manipulation, incident root-cause analysis, planning reports and Power BI delivery.

DATABASE ADMINISTRATOR | BIDVEST MAGNUM

December 2008 - April 2012

- Administered SQL and BI platforms, operational reporting, SharePoint and ERP data integrations in a security-services environment.

TECHNICAL ANALYST / SOFTWARE DEVELOPER | SEKCHEK INFORMATION PROTECTION AND TEKNATIC

January 2005 - November 2008

- Developed and supported monitoring, risk-control and enterprise information systems; performed testing, debugging, technical support and training.

Education and Certifications

- National Diploma in Information Technology, Mangosuthu Technikon, 2003.
- Microsoft Certified: Azure Data Engineer Associate (DP-203).
- Microsoft Exam 70-461: Querying Microsoft SQL Server 2012/2014.
- Certified Data Vault 2.0 Practitioner.
